Career Objective

Innovative and results-driven DevOps Engineer with strong experience in Python/Django development, automation, and cloud infrastructure. Passionate about implementing CI/CD pipelines, containerization, and Infrastructure as Code to ensure reliable and scalable system deployments. Seeking to contribute to Synesis IT PLC as a DevOps Engineer, driving automation and operational excellence in enterprise environments.

Professional Summary

- 4+ years of hands-on experience with Python, Django, and REST API development.
- Skilled in Docker, Jenkins, GitHub Actions, Kubernetes, Ansible, and Terraform.
- Experienced in AWS cloud services (EC2, S3, IAM, CloudWatch).
- Strong foundation in Linux system administration, networking, and security hardening.
- Familiar with CI/CD pipeline design, version control, and automated deployments.
- Excellent problem-solving, teamwork, and continuous learning attitude.

Certifications

- AWS Cloud Practitioner (Ongoing)
- Docker & Kubernetes – Udemy (2025)
- Python for DevOps – Coursera (2024)
